1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 5, 6, 8, 9, 11, 12-15, 19-22, 51 and 52 are rejected under 35 U.S.C. 102(b.) as being clearly anticipated by Schenk.

See especially figure 2, phase-locked oscillator 11, divider 6, mixer 15, and column 2, lines 65-68.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schenk.

Schenk disclosed a generator with a VCO divided and mixed as claimed.

Dividers had stages, that were dividers, and thus a second divider was disclosed. The radio transceiver applications of the Schenk methodology

included incorporation in telephony such as claimed with the claimed known transceiver circuitry. It would have been obvious to one of ordinary skill in the art to have incorporated the known transceiver circuitry as claimed with the Schenk methodology "motivated" by design option as taught by Schenk to use known systems with his methodology employed for the counterparts therein.

5. This is a continuation of applicant's earlier Application No. 09/797,745. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
